

MAVBRIDGE™ FOR LOCKBOX

Mavro's lockbox solution offers the most efficient method for processing diverse payment types that will optimize your client relationships and maximize your bottom line.

Exceeding Expectations

MAVBRIDGE™ FOR LOCKBOX

Single Versatile Platform

Retail and wholesale payments and virtually all document types are processed on a common platform that is completely configurable without any custom code.

Total Security

Satisfies the most stringent data security requirements with system-wide encryption, automated and user-initiated redaction, and extensive auditing.

Flexible Import

Connects to any scanner or transport. Imports images and data from fax servers, emails, transaction files, and a wide variety of other sources.

One-Touch Processing

Without sorting, effectively processes all transaction types—singles, multiples, check only, even correspondence—in a cohesive, flexible workflow.

Extensive Release Scripts

Interfaces to virtually any external system with configurable file extracts, complete database support, and web services.

Intelligent Check Perfing

Electronically separates checks from full page business payments for increased scanning productivity and improved quality.

Interactive OCR

Leverages OCR technology with a unique interactive process that drastically reduces keying labor and improves data capture accuracy.

Image Enhancement

Improves readability by enhancing challenging images, including money orders and documents with gel pen writing, while reducing file size.

Data Validation

Increases the accuracy of captured data, such as account numbers and addresses, by validating against a wide variety of databases and file types.

THE BANK OF KENTUCKY

“In one word, the Mavro Team is exceptional. They really listened to us and built a complete solution that meets our particular needs, on time as promised.”

“Working with Mavro has been amazing. Their values – especially integrity, partnership, and results – mirror Pinnacle’s, which made for a great working relationship.”

RETAIL, WHOLESALE, AND CONSOLIDATED RETURNS

Mavro provided The Bank of Kentucky a complete One-Touch Processing solution on a common platform. Documents are now touched only once, when extracted and scanned, and the MavBridge™ Solution handles every transaction type and every conceivable exception. A consolidated returns process simultaneously handles feeds from multiple sources, captures necessary data, and provides outputs that are routed to numerous clients.

INNOVATIVE TECHNOLOGY

Mavro helped revolutionize a lockbox operation that spans over 400 wholesale and retail clients at multiple sites. A table-driven approach for client setup allowed the bank to effectively manage the conversion process from the previous system. And, with innovative tools such as Check Perfing, Interactive OCR, and Smart Track™, the efficiency and quality of the operation was significantly increased.

ON TIME AND ON BUDGET

Mavro closely collaborated with Pinnacle to convert 200 retail and wholesale lockbox clients within an extremely challenging six week deadline while adding new functionality. Lockbox clients now receive automatically-generated emails when the work is completed and can use advanced searching tools to access images, reports, and downloads using the Pinnacle-branded Connect™ Web Portal.

CONNECT™ Web Portal

Provides simple-to-use, yet immensely powerful, document and data management. System users and lockbox clients can easily search for archived images and data, view stored reports, or download extract files. Configurable workflows enable automatic routing of any document to operator work queues.

Dashboard

Delivers automatic monitoring and event reporting along with visual status checking, so that users always know exactly how the system is performing.

Workflow Monitor

Continuously tracks every step in the system and ensures that every process is running smoothly. Warns supervisors immediately via display alerts or email if attention is required.

Smart Track™

A patented process that tracks the physical location of every document to ensure all transactions are scanned, processed, warehoused, and shredded on time.

MAVRO
I M A G I N G

Whether looking for a small improvement to an existing lockbox system or refreshing your entire operation, Mavro will deliver the flexibility, innovation, and affordability sure to exceed your expectations.
