

# MAVBRIDGE™ SOFTWARE SUITE

MavBridge™ includes all the components necessary to optimize integrated payment, forms, and document processing solutions, regardless how simple or complex.

*Exceeding Expectations*

# MAVBRIDGE™ SOFTWARE SUITE

## Continuous Innovation

Over 250 new enhancements are developed for our solutions every year. MavBridge™ is completely configurable without custom code, and upgrades are always free.

## Flexible Import Modules

Imports images and data from any scanner or transport as well as fax servers, emails, and electronic transaction files.

## MavBridge™ Core

Eliminates the constraints of legacy systems with an advanced client-server architecture built on a .NET framework. Our solution includes system-wide encryption and extensive auditing to satisfy the most stringent security requirements.

## Data Enrichment Modules

Provides powerful, flexible, and scalable modules for the challenges associated with processing and data entry for all document types. Here are just a few of the modules available:

- **Smart Batching™**

Electronically sorts transactions for advanced One-Touch scanning and processing.

- **Document Classification**

Automatically identifies documents using an intelligent combination of OCR, barcode, mark sense, and other image characteristics.

- **Recognition Suite**

Dramatically increases read rates and reduces keying labor using CAR/LAR, OCR, ICR, OMR, and 1D and 2D barcodes.

- **Image Enhancement**

Unique Mavro technology that improves image readability and enhances critical document areas while reducing image file size.

- **Data Validation**

Improves the accuracy of captured data, such as account numbers and addresses, by validating against a wide variety of files, databases, or web services.

## Dashboard

Mavro's unique viewer for automated operational management allows you to quickly evaluate your system's current or past performance.

- **Real-Time Status**

Proactively provides alerts and enables managers to evaluate resource utilization at a glance.

- **Statistics Reporting**

Gives users the information needed to make productivity improvements. Tracks progress made across any timeframe.

- **Workflow Monitoring**

Continuously tracks every step in your system and ensures that everything is running smoothly. Alerts supervisors immediately if attention is required.

- **Smart Track™**

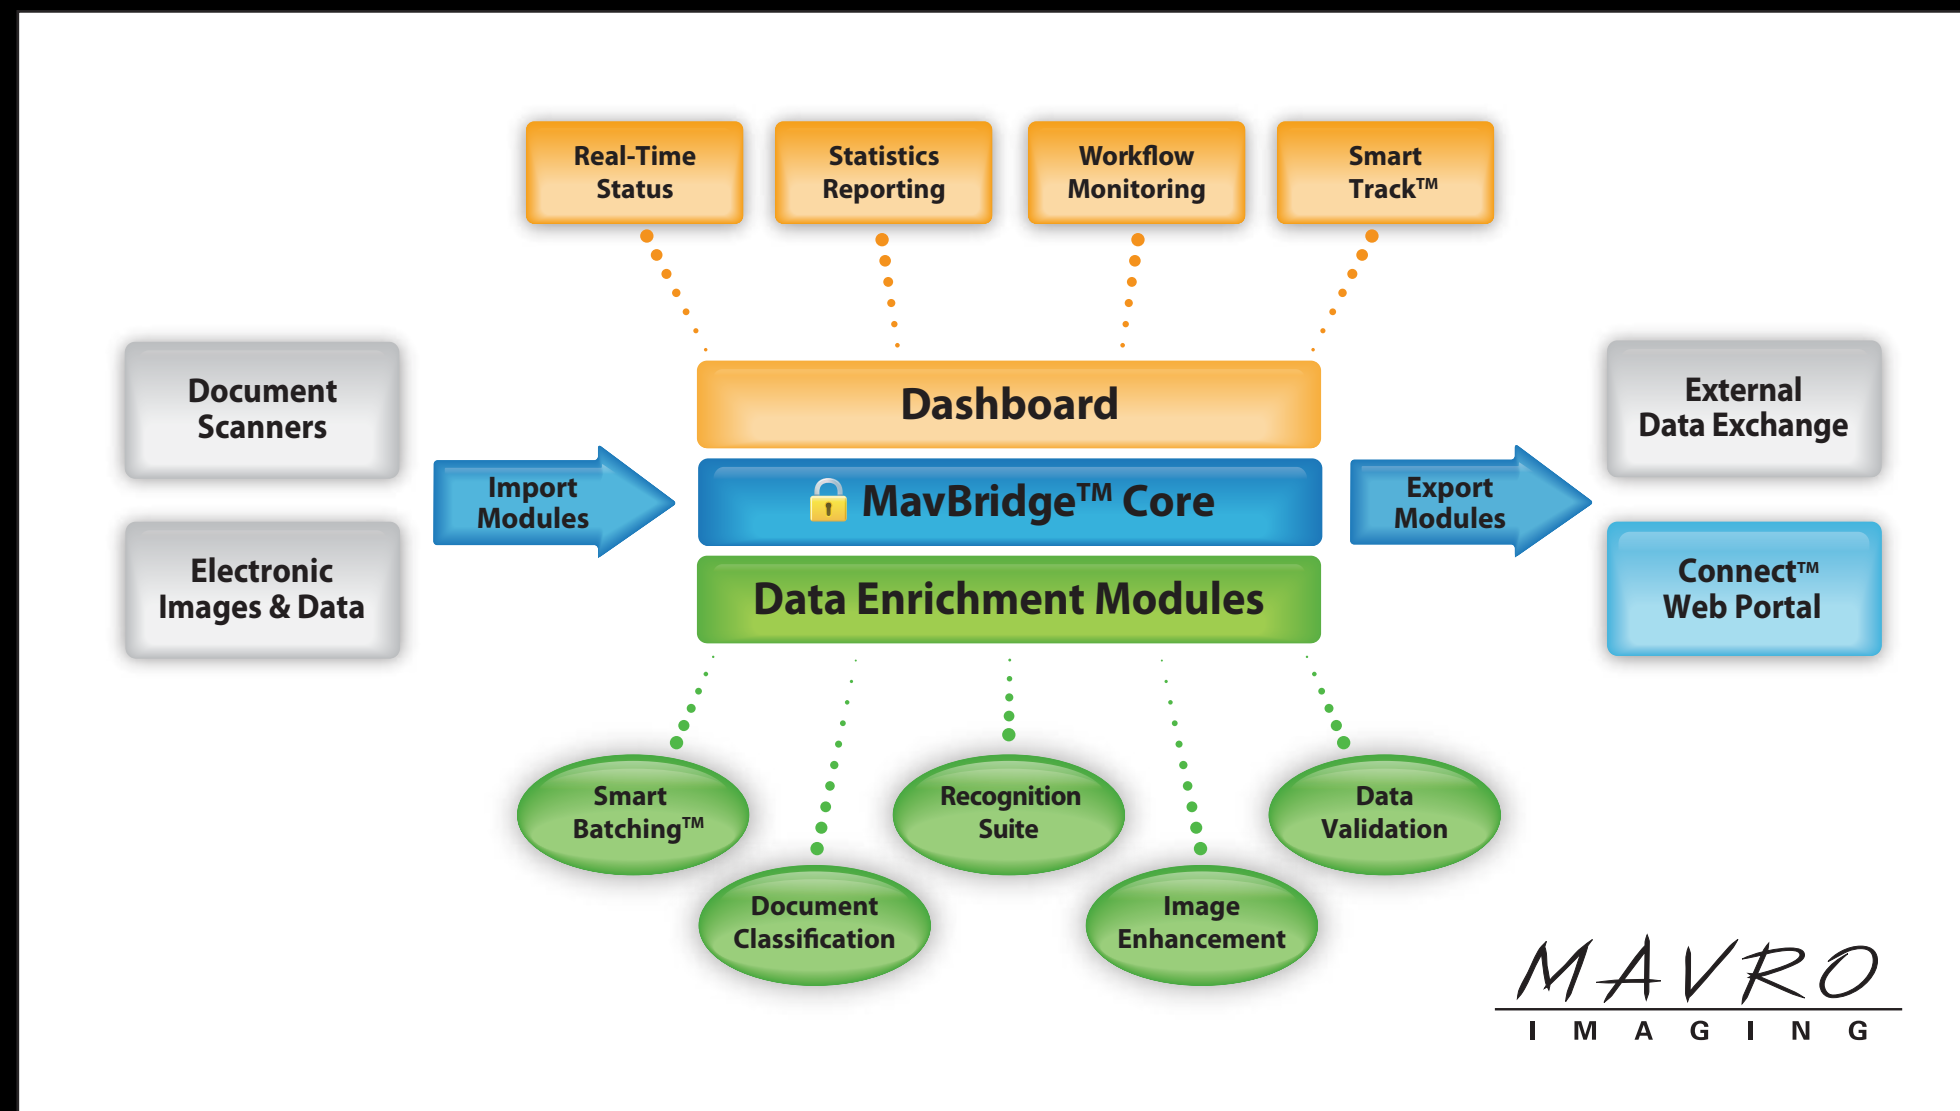

This patented module tracks the physical location of every document to ensure all transactions are scanned, processed, warehoused, and shredded on time.

## Extensive Export Modules

Interfaces to virtually any external system with configurable file extracts, complete database support, and web services.

## Connect™ Web Portal

Provides simple to use, yet immensely powerful document and data management. Users can easily search for archived images and data, view reports, and download saved extract files. Configurable pre- and post-deposit workflows enable any exception item to be automatically routed to operator work queues for special handling.

Whether you are looking to make a small improvement to an existing system or completely refresh your entire operation, Mavro delivers the flexibility, innovation, and affordability that continues to delight our customers.
