INTEGRATED RECEIVABLES PLATFORM
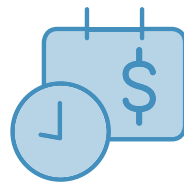

for Lockbox Providers

With today's businesses offering customers expanded payment options, lockbox providers require an intelligent and flexible processing platform to manage the various forms of payments. As a result, banks are turning to Mavro's MavBridge™ software suite to integrate client receivables, speed payment processing and boost their bottom line.

MavBridge™ Helps Lockbox Providers

Automate Payment Processing

Reduce Days Sales Outstanding (DSO)

Increase Profitability
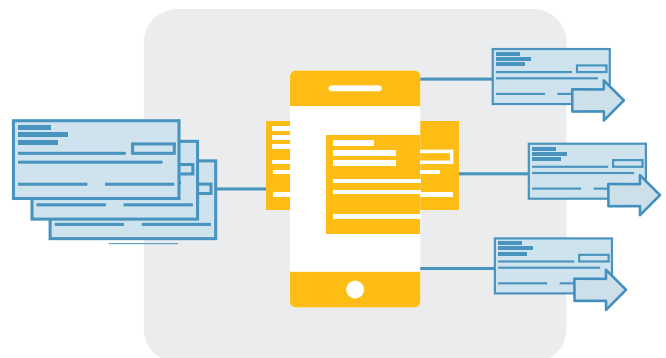

Process Retail and Wholesale Payments

- Utilize One-Touch Processing to eliminate extra sorting steps, decrease processing times and reduce labor costs up to 65%.

- Implement flexible and easily configurable workflows to automate recognition and routing of document images based on defined business rules for improved access, auditability and actioning.

Maximize Your Bottom Line

- Optimize labor costs to drive your margin using Smart Batching to limit document touches and eliminate manual tasks.

- Generate additional streams of revenue by integrating your clients' other documents and receivable channels for improved efficiency.

Improve Client Relationships

- Provide clients access to Mavro's Connect™ Web Portal for pre-deposit decisioning of exceptions and researching stored transactions and reports.

- Satisfy the most stringent data security requirements and eliminate the risk of client data breaches with robust end-to-end encryption.

GROW LOCKBOX BUSINESS AND INCREASE REVENUE
