

MAKE MAIL ACCOUNTABLE

with Smart Track™

End-to-End Tracking for All Physical & Electronic Documents

Smart Track provides combined physical and electronic tracking throughout the entire life cycle of each mail piece received and processed. Tracking begins immediately upon initial receipt of items and subsequently continues at each processing step, throughout the document retention period, and finally ensures timely destruction.

Knowing the exact document location during each step of the process allows operators to quickly locate an item if rescanning or forwarding is required, saving a tremendous amount of labor. With Smart Track, mailroom workers no longer need to search through mail bins to find a specific document. The software tells them where items are, and an image is displayed to ensure the correct item is located.

Receive – Scan – Move – Store – Shred

Provide Peace of Mind by Tracking all Document Movement

Ensure your mail processing, document retention and destruction activities are in full compliance. You'll be able to monitor the location and status of each item and get alerts. Obtain compliance confirmation for both retention time and documents destruction requirements.

Smart Track™ is a Unique Mavro Imaging Patented Product

You can't get Smart Track anywhere else.

And it's only one of many unique modules available from Mavro to save you time and money in your operation
