

MAVBRIDGE™

Streamlined Remittance Processing for Utilities

MavBridge™ software provides a complete solution to simplify your remittance processing workflow. Integrate advanced imaging, data recognition and electronic deposit technologies with the most powerful remittance processing solution.

Using MavBridge, you can significantly reduce the need for physical document handling and exception conditions by processing payments in a more timely, accurate, and cost-efficient manner.

MavBridge allows utilities to quickly process payments and efficiently handle exceptions, such as multiple checks and coupons, summary bills, and correspondence.

Unique Features & Benefits:

- ✓ **One-Touch Processing**
Eliminates pre-sorting so you can scan ALL transaction types together.
- ✓ **Smart Batching**
Electronically groups transactions by type or characteristic for optimized efficiency.
- ✓ **SmartTrack**
Patented module that tracks all batches to ensure they are scanned, processed, and shredded.
- ✓ **Electronic Payment Integration**
Workflows for electronic file or paper capture sources without a single line of custom code.
- ✓ **Flexible Integration**
Connects to any scanner, transport, electronic payment source, or downstream application.
- ✓ **Security**
Encryption and extensive auditing meet the most stringent data security needs.
- ✓ **Dashboard**
Provides real-time visibility of employee productivity and system performance.
- ✓ **Return on Investment**
Increased efficiency and quality plus value pricing and free upgrades produce a compelling ROI.

The Utility Company Experts

MavBridge significantly reduced the need for physical document handling and exception processing. As a result, PSE&G not only realized the full value of its investment but also exceeded performance targets and quality benchmarks.

“With the inherent flexibility of Mavro’s software, we were able to optimize each process, resulting in one of the most efficient operations in the country.”

Operations Manager

PSE&G

“I could not have asked for a better team to lead us through this huge transition.”

Operations Manager

Northwestern Energy

The Mavro team delivered a comprehensive solution ahead of schedule and within budget. The resulting unified system streamlines all payment processing tasks, enhancing operational efficiency and ensuring timely completion of work.

Enterprise-wide monitoring provides real-time data from every scanner, workstation, and remittance process, offering a consolidated view of current operations. This ensures that all systems function efficiently and effectively and maintain high-performance standards.

“We’re realizing the enormous potential beyond check processing and have a partner invested in our success.”
