

About Mavro Imaging

Document Processing Efficiency Starts Here.

Increase Efficiency. Streamline Workflows. GET RESULTS.

Founded in 2007, Mavro helps companies gain efficiency, reduce manual labor and save money by automating the processing of documents and payments. Our remittance, lockbox, and document imaging software is backed by support from our responsive team of experts.

We've installed hundreds of solutions with One-Touch Processing as the foundation for organizations to achieve newfound value and rapid return on investment.

Remittance Processing

Claims & EOB Processing

Lockbox Solutions

Digital Mailroom

Document Imaging

Image Archive & Workflow

Remote & Mobile Capture

Disaster Recovery

MavBridge™ Software Suite

Our flagship software platform was developed in-house by our expert Engineering Team for maximum flexibility. [MavBridge™ Core](#) is the heart of the system that connects modules to create one seamless solution, optimized for your organization without custom code.

AI Makes it Smarter

MavBridge uses AI engines and neural networks to significantly improve read rates and reduce manual intervention for remittance processing, check-and-list processing, and the reading of structured and unstructured forms.

Artificial Intelligence

Our AI-powered solution delivers faster processing, greater accuracy, and less manual intervention across many document types.

Collaboration is Key

We work to fully understand your pain points. Together, the Mavro/Customer team builds and executes the project plan.

Dedicated to Development

We add hundreds of new features and functions each year. Under our support agreements, upgrades are always free.

Culture of Support

Our integrity is embedded in our support response averaging just 1.4 minutes with most issues resolved in under an hour.
